Industrial Strength

The challenges associated with expanding industrial capabilities can quickly overwhelm the most experienced managers. Rely on our design-build project team to help shoulder this burden. Through the focused use of our technical resources and staff expertise, we develop practical, cost effective solutions geared toward your specific needs. Your benefits from our commitment to self-performed work include cost estimates based on real field experience and our ability to assure project quality based on historical performance of our experienced craftsmen. Ayars & Ayars: design-builders for the structures that drive American industries.

Customer Driven Construction Solutions

- Single Point of Responsibility: One team, one phone number simplifies communication.
- Safety: Our employees are our future! Our safety training is an insurance policy for that future.
- Early Knowledge of Project Costs: Accurate pricing based on actual experience provide known & predictable costs.
- Self Performed Work: Efficient usage of workforce and equipment saves owners time & money.
- "...Performed in a manner I have seen very few times in my career..I think you just re-wrote the book." - Ernie Pence, Excel
