

Commercial

B&J Partnership - Standard Meats

Meat Market

It's difficult to tell where the original brick structure ends and the new tilt-up addition begins in this commercial space. Utilizing the Scott Brick System to embed brick directly into the tilt-panels saved the customer time and money. Ayars & Ayars, Inc, scopes of work on this design-build project included: foundations, tilt-up erection, steel erection, concrete flatwork and paving. This project received an "Excellence in Construction" award from Associated Builders & Contractors.

Project Details

- Lincoln, Nebraska
- 25,536 sf
- Tilt-Up
- Project Completion: 2004
- B&J Partnership was founded in 1961 and is based in Lincoln, Nebraska.
