Linweld Air Separation

From the Foundation Up

This unique facility is Linweld's cryogenic air separation plant; producing purified nitrogen, oxygen, argon and other gases on an industrial scale. Ayars & Ayars, Inc. scopes of work on this project included: expansion of the support and command buildings that control the air separation process and facilitating foundations for the two large air tanks pictured. We are proud of the number of customers for whom we have completed several projects; Linweld is a prime example.
