Vogel Popcorn

Popcorn and a Movie

An enhanced customer entrance, testing labs and a climate controlled warehouse were the goals of this design-build project. Design-build often gets projects completed faster and provides opportunities for cost savings. An interesting sidelight: site preparation was accomplished in part, with a controlled burn - an exercise coordinated by the local volunteer fire department.

Project Details

➤ Hamburg, Iowa

➤ 10,000 sf

➤ Pre-Engineered Metal Building

➤ Project Completion: 1999

➤ Vogel Popcorn: Possibly the best popcorn in the world.
