

## Humboldt - Table Rock - Steinauer Public School

### *Everyone's Benefit*

Design-Build construction proved to be the best option for this indoor air quality project for School District 70's facility. Students and staff will benefit from the enhanced learning environment provided by the 'California Loop' heat pump. Area taxpayers will be pleased by the reduction in costs associated with conditioning the facility's environment as well as additional savings realized through replacement of the original windows throughout the structure. Work on this project began in April 2008 and the entire renovation was completed prior to the beginning of the 2008 - 2009 school year.

### Project Details

- Humboldt, Nebraska
- 63,483 sf
- Renovation - Indoor Air Quality
- Project Completion: 2008
- Home of the Titans.
