Excel Corporation Waste Water Treatment Facility

Solid for Liquid

This state of the art waste water treatment facility includes four cast-in-place concrete treatment basins, pump house maintenance garage and space for offices and laboratories. Highlighting the project was the performance of our concrete crews; placing the 2,400 cubic yards foundation in under 12 hours. The talents and abilities of our employees are the key to the success of every Ayars & Ayars, Inc. project.
