

Industrial

Iowa Beef Processors, Inc.

AFTER

Roof Repair

If all the roof panels Ayars & Ayars, Inc. replaced on this project were laid end to end, they would span 54 miles. Beyond the plant re-roof, our scopes of work included purlin replacement over the rendering area, waterproofing 250 roof penetrations and installation of 150 roof curbs. A new service walkway provides access to rooftop mechanical systems. The processing plant remained at full production throughout the construction process.
