

CON-E-CO Paint Booth

Making it Work

Once the new machine shop project was completed, it was time to enlarge and convert the vacated space into a state of the art paint booth. Due to the nature of the coatings CON-E-CO uses, indoor air quality for the workers, fire suppression, and environmental air quality were all challenges successfully addressed during this design-build project.

Project Details

- Blair, Nebraska
- 1,000 sf
- Pre-Engineered Metal Building
- Project Completion: 2006
- CON-E-CO's concrete plants can be found throughout the world.
