Faith Lutheran Church

Expanding Fellowship

Originally built in the 1960's, the demands of a growing congregation required Faith Lutheran to expand and renovate it's facilities. The new addition creates space for a multi-purpose room, additional classrooms, full kitchen and staff offices. Special attention was given to integrating the new structure into the existing church; protecting and relocating trees that were sacred to the congregation. The daily activities of the church and it's day care facility continued unaffected throughout construction process.
