

Westfield Quality Care of Aurora

Welcome Home

Ayars & Ayars, Inc. is no stranger when it comes to building skilled nursing facilities. This time, Westfield Quality Care chose us to participate in this project because of various relationships already present between Ayars & Ayars, Inc. and community members of Aurora. This 42,000 sq. ft. wood framed facility will provide new homes to members of the Aurora community and surrounding areas. The centrally located nurses station is designed to efficiently serve each of the resident wings and the commons area. This will reduce the amount of employees needed to staff the entire building.
