Christ Community Church

Worship Him

Ayars & Ayars, Inc. was selected by Christ Community Church to complete a worship center and atrium remodel. This remodel will start with selective demolition of doors and fixtures, acoustical ceiling, sound/lighting booth, and the existing choir loft. The remodel will include adding new carpet in the worship center and atrium, new acoustical ceiling in the worship center, and new screens in the atrium for a better viewing experience for all parishioners. We will also be adding a new sound and lighting booth to update the church's technology.
