

# Gretna Daycare

## Made to Endure

Ayars & Ayars, Inc. was excited to be selected by Little Feet Big Steps to build their first daycare. The 10,192 sq. ft. wood framed building will consist of various rooms for children ranging from infants to pre-kindergarten age. One special feature included within this building is a hardened room that will protect children from 200 mph wind speeds. This room will ensure safety for all children present in the case of inclement weather. Our scope of work will be a turnkey package. We will provide site work, concrete, masonry, wood frame construction, finishes, and build out.

## Project Details

- Location:  
Gretna, Nebraska
- Size:  
10,192 sq. ft.
- Type of Construction:
