Jetsplash #5

Squeaky Clean!

Ayars & Ayars Inc. is pleased to be working with Jetsplash once again to provide Design/Build solutions for their new station located at 84th and Highway 2 in Lincoln, Nebraska. This car washing station is constructed using Insulated Concrete Forms (ICF) instead of conventional insulation. This process uses eco-friendly materials and also allows for a faster project delivery which, in turn, makes the entire building process very efficient. We will also pave the entire parking lot.

Project Details
