Rasmussen Mechanical Re-Roof

Together Again

Ayars & Ayars, Inc. and Rasmussen Mechanical are collaborating once again. We first partnered in 2005 to update their current office/warehouse facility in Council Bluffs, Iowa. This time we will be re-roofing the original roof with Butler's MR-24 Roof System with a new 3" batt system, which helps control condensation. One hundred five sunlight strips will be included in the new roof to provide ample amounts of light within the facility. Crews will then complete this project by installing a new internal drain system.

Project Details

➤ Location:
Council Bluffs, Iowa
