

Syngenta Remodel & New Building

Get it Done!

Ayars & Ayars, Inc. is excited to team up with Syngenta once again to complete a two part project. The first portion of the project includes a remodel to remove some electrical and demolition of a concrete slab. New doors and a wall will be added to create an exit and to enclose the structure. The second part of the project consists of constructing a new Butler Manufactured pre-engineered metal building that will be used to collect waste created by the plant. To meet Syngenta's strict timeline, Ayars & Ayars, Inc. will complete the project by the end of 2017.

Project Details

- Location: Omaha, Nebraska
- Size: 3,388 sq. ft.
- Type of Construction: Interior Renovation & Pre-Engineered Metal Building
- Project Schedule: Winter 2017
- Syngenta: Bringing plant potential to life.
