UTC Aerospace Re-Roof

New Year New Roof

Ayars & Ayars, Inc. is excited to be working with UTC Aerospace Systems to complete a 105,000 sq. ft. re-roof at their existing facility in York, Nebraska. Our scope of work includes demolition and metal fabrication. After demolishing the selected roof trims, gutters and downspout, we will be installing a new MR-24® Roof System over the existing roof. Wood blocks will separate the new and old roof, and insulation will be installed to ensure no foreign objects are introduced to the new roofing system.
