WSM Warehouse Addition

Adding On!

Ayars & Ayars, Inc. has partnered with WSM to provide design/build services for an addition to their current facility in Omaha, NE. The addition will include 10" thick concrete floors re-enforced with rebar to ensure strength to withstand the high volume forklift traffic. The pre-existing building is a brick and mortar mason structure. The new addition will be constructed of pre-engineered metal. Our talented design team was able to create a concept that would incorporate these two materials to establish one esthetically pleasing look for the completed building.

Project Details

Location:
Omaha, Nebraska

Size:
21,000 sq. ft.

Type of Construction:
Pre-Engineered

Project Completion:
Winter 2017

WSM Industries is a Midwest regional leader in HVAC supplies and custom metal fabrication.
