Jack Daniel's Distillery

Rack 'em Up

Our fourth project in the last 2 years on the Jack Daniel's site and another of our many collaborations with the Frazier Industrial Company, this 75' tall structure houses the famous Jack Daniel's whiskey as it ages inside oak barrels. Once the Frazier Industrial Company's rack storage system is put in place, Ayars & Ayars, Inc. erects the metal building around the racks.

Project Details

➤ Lynchburg, Tennessee

➤ 28,000 sf

➤ Pre-Engineered Metal Building:

➤ Projects Completed: 2005
2006
2006
2007

➤ Jack Daniel's is still judged the same way. By the way it looks. By the way it smells. And of course, by the way it tastes.
