

Commercial

Federal Express - Council Bluffs

International Influence

Federal Express Ground's new regional distribution center receives packages from other centers located throughout the country. Once unloaded, boxes are sorted and reloaded onto trucks and vans for customer delivery. Additionally, this facility distributes outbound packages destined for other regions of the world. While at its heart, this is a pre-engineered metal building, extensive use of split-face block and an attractive paint scheme give this facility a clean, modern look. This facility is designed to handle a peak load of 4,800 packages, both inbound and outbound per hour.

Project Details
