

Hughes Brothers Galvanizing Addition

Overcoming Obstacles

When Hughes Brothers needed to expand and modernize their galvanizing operation, Ayars & Ayars, Inc. was pleased to provide this design-build solution. Three challenges our team overcame on this project were: the project required us to open two sides of the existing structure without disrupting plant operations, safely working within 20' from operational railroad track, and creating a cohesive addition to an 81 year old building.

Project Details

Location:
Seward, Nebraska

Size:
7,500 sq. ft.

Type of Construction:
Pre-Engineered Metal Building

Project Completion:
2006

Hughes Brothers now has a versatile metal fabrication facility complete with their own galvanizing plant.
