

# ISCO, Inc.

## Expand and Consolidate

The need to combine two manufacturing facilities under one roof prompted ISCO to expand and renovate their Lincoln facility. Our design-build team created space for ISCO's shipping, receiving, molding, machine shop, assembly, engineering, accounting and sales departments as well as corporate office space. Careful attention to details enhanced ISCO's ability to design, manufacture, and distribute their water testing equipment on a global scale.

## Project Details

Location:  
Lincoln, Nebraska

Size:  
168,000 sq. ft.
