LUX Remodel - Phase II

Down to a Fine Art

Ayars & Ayars began work on the Phase 2 Remodel of the LUX Center for the Arts. We worked with the LUX Center for the Arts on their original Phase 1 remodel and we are excited to have been selected once again for the second phase remodel. The remodel of the two story building will take place in two stages which will allow the business to remain open during construction. Work will be completed on one level before relocation to the second floor. The scope of work for this project includes demolition, site work, concrete, masonry and carpentry.

Project Details
