RE: People's Health Center

Dear Dave:

On behalf of People's Health Center staff and our Board of Directors we would like to thank the staff at Ayars & Ayars for the successful completion of the Phase 1 & Phase 11 construction projects. It is noted that the company has a friendly, personal and knowledgeable and reliable staff to work with. Our construction projects required Federal guidelines and your personnel were in compliance with the statues. All telephone calls and emails to your office were always answered promptly and construction matters addressed appropriately. The quality of the work is superb. The careful planning of the work schedules eliminated some planned contingencies and reduced work change orders. We met completion deadlines for both projects. Please use this letter to serve as a reference for your company as you engage in other construction work with constituents of Lincoln and surrounding areas of Nebraska and or abroad.

Sincerely,

Cecelia Creighton,  
Executive Director
