BNSF Mezzanine

Mezzanine Madness

BNSF and Ayars & Ayars Inc, have partnered up to design and build a mezzanine addition that will add much needed space for racking. We were chosen to complete the project because BNSF trusted we could get the project done on time and on budget. There was a certain amount of headroom that was required for the mezzanine that we had to account for during our design stages. We also had to meet the owners requirements when it came to building the mezzanine loading area. Our scopes of work included design, steel erection, insulation retrofit, and slab on deck.

Project Details

➤ Location:
Fridley, Minnesota

➤ Size:
868 sq. ft.

➤ Type of Construction:
Pre-Engineered Metal

➤ Project Completion:
2016

➤ BNSF is a critical link that connects consumers with the global marketplace.
