

Religious

Hope Lutheran Church

Relocation

Ayars & Ayars, Inc. was honored to have been selected to build a new church in Farmington Minnesota. The new 8,967 sq. ft. structural building was built on five acres of land in Empire Township. The congregation had grown to about 70 members, and was in need of a larger space to worship. After being in the planning stages for the last four years, the church was finally ready to take the next big step in its growth. This structural steel church includes a sanctuary, entry way/commons, classrooms, and offices once completed.
