

Landmark Warehouses

High Growth Rate

With the Lincoln market in need of quality warehouse and light industrial space, local developers tapped the expertise of Ayars & Ayars, Inc. to design and construct two new warehouses totaling 36,000 sq. ft. of space. These buildings feature clearspan Butler metal building systems with a blend of façade panels to meet both the requirements of the development association's covenants while still meeting the developer's budget needs. Sitework included dirtwork and paving that was completed in order to combat the issue of being located within a flood plain.

Project Details

Location:
Lincoln, Nebraska

Size:
#1 - 18,000 sq. ft
#2 - 18,000 sq. ft.

Type of Construction:
Pre-Engineered Metal Building
& Insulated Metal Panels

Project Completion:
2017

This project will create much
needed space for warehouses in
Lincoln, Nebraska
