## Sterling Public School

### Timing is Everything

Ayars & Ayars, Inc. faced the seemingly impossible task of completing Sterling Public School's building addition and school renovation project in 18 weeks. The project schedule met the requirements for the students to occupy the new building for the fall semester of 2005. Demolition began the last of school on April 22, 2005. The project maintained its aggressive schedule and the facility was ready to open for the start of the new school year on September 6, 2005.
