

# Vertical Limit

## Going UP!

Ayars & Ayars, Inc. has partnered with Vertical Limit to complete multiple projects. These projects include constructing various types of shelters to house the electrical panels that control the wireless towers built by Vertical Limit. The shelter construction type differ from one project to the next. For example: Stick frame, block frame, stick frame with brick siding, etc. Our scope of work generally include wood frame construction, block and brick installation, metal stud install, and FRP paneling. We hope to partner again in the future to ensure Vertical Limit's projects get done in a timely manner and within their budget.

## Project Details
