

Little Feet Big Steps

Made to Endure

Ayars & Ayars, Inc. was excited to be selected by Little Feet Big Steps to build their first daycare. The 10,192 sq. ft. wood framed building consists of various rooms for children ranging from infants to pre-kindergarten age. One special feature included within this building is a hardened room that protects children from 200 mph wind speeds. This room ensures safety for all children present in the case of inclement weather. Our scope of work included a turnkey package. We provided site work, concrete, masonry, wood frame construction, finishes, and build out.

Project Details

➤ Location:
Gretna, Nebraska

➤ Size:
