Nestle Purina Pet Care Re-Roof

Do Over

Ayars & Ayars, Inc. was excited to be selected for the re-roof at Nestle Purina Pet Care. This re-roof project used the roof over technique. The new roof is placed directly over the existing roof. A piece of plastic is installed underneath the existing purlins inside the building to insure that no foreign objects were not introduced. This allowed the company to continue their work for the entirety of the project, saving time and money.

Project Details
