Rasmussen Mechanical Re-Roof

Together Again

Ayars & Ayars, Inc. and Rasmussen Mechanical collaborated once again. We first partnered in 2005 to update their current building in Council Bluffs, Iowa. This time was to complete a re-roof of their original roof with Butler's MR-24 Roof System with a new 3" batt system, to control condensation. One-hundred-five sunlight strips were included in the new roof to provide ample amount of light within the facility. Crews then installed a new internal drain system to ensure no moisture entered the facility.

Project Details
