Wenger East Admin Building

Bridging the Gap

Ayars & Ayars Inc. built a conventional steel framed office building that is designed to exceed LEED silver certification. This building is located in Sabetha Kansas, and is approximately 23,000 square feet spread over two stories. The design incorporates cutting edge power management and natural light distribution into an occupant friendly floor plan. This project is an extraordinary example of a Design-Build partnership with commitment to environmentally responsible building design and construction.

Project Details
