

Commercial

P Street Reroof

Roof Over Head

Ayars & Ayars, Inc. was honored to be selected by Speedway Properties again to reroof several of their existing facilities in Lincoln, NE. We have worked with Speedway Properties in the past both building new facilities and reroofing existing properties. The 6800 reroof utilizes the High Profile Metal Over Metal (HPMOM) MR-24® Standing Seam Roof System, while the 6810 reroof utilizes the Low Profile Metal Over Metal (LPMOM) MR-24® Stand Seam Roof. Both systems allow the new roof to be placed over the existing roof.
