

Industrial

BNSF

All Aboard!

Ayars & Ayars, Inc. has completed several projects with BNSF Railway over the course of many years and across much of the United States, including the construction of their new Way Facility in Illinois. The existing building was demolished and replaced with a structural steel building with a Butler MR-24 Standing Seam roof system. Our scope of work for the project included site work, concrete, carpentry and metal.

Project Details

- Location:
Willow Springs, Illinois
- Size:
