## Citizens State Bank

### Finances in Fashion

Our team was eager to begin when Citizens State Bank called on us to renovate their existing facility in Papillion, NE. The project involved selective demolition to multiple areas, including the partial removal of a conference room wall to create an opening for a new window. Our modern design included carpet tile with wood base trim for the offices, copy room, hallways, and reception area. Our scope of work for the project includes sitework and finishes.
