

Educational

Aurora Public Schools Entrance & Band Room

Life is Better with Music

At Ayars & Ayars, Inc. we believe that a great project begins with a great relationship. That is exactly how this project began - with an existing relationship with a long time Aurora Native. This particular project was actually three projects in one. An addition for the high school to create an updated main entrance, an addition for the middle school band room and a remodel for the middle school music room. Our scope of work included demolition, concrete, masonry, metals, & finishes.
