

Teledyne ISCO - Parking Lot

Premium Parking

Our team was honored to receive Nebraska Concrete Paving Association's (NCPA) "Award for Excellence in Concrete Pavement" for our recent concrete overlay project with Teledyne ISCO in Lincoln, Nebraska. Crews took a different approach when finding a solution for this project. Instead of tearing out all portions of the existing parking lot, they decided they only needed to remove certain areas. Crews were able to complete a concrete overlay application which saved time and money at the end of the day. Once the concrete work was complete, we furnished and installed soil and seeding in islands and around the perimeter of the parking lot.

Project Details

- Location:
Lincoln, Nebraska
- Size:
149,400 sq. ft.
- Type of Construction:
Concrete Overlay
