

Silver Lake Elementary

Above Average

Silver Lake Elementary was in dire need of an update to their school in Bladen, NE to better provide for students who have physical disabilities. Ayars & Ayars, Inc. crews demoed the existing multi-level school, only leaving their gym standing. We then built a brand new, pre-engineered metal, one level school where all students could excel no matter their situations. This two phase project was completed within a tight time frame which allowed teachers and students to return to their new classrooms as soon as possible. Our scope of work for the project included site work, concrete, masonry, metals and carpentry.
