

Pre-Engineered Metal Building

Building Addition

Inching Toward an Addition

Ayars & Ayars, Inc. was excited to work with Caterpillar, one of our repeat customers, on an addition to their existing location in Brooklyn Park, Minnesota. Our team demolished portions of the existing building, such as a concrete pad, a concrete retaining wall, and exterior wall packs that were salvaged and reused later in the project. The addition is equipped with an Ultra-Dek roof system crafted from 24-gauge steel. Our scope of work for the project included sitework, concrete, masonry, metals and finishes.

Project Details

Location:
Brooklyn Park, MN

Size:
44,728 sq. ft.

Type of Construction:
Pre-Engineered Metal Building

Project Completion:
2020

Caterpillar Inc. is a market-leading producer of paving and construction equipment.
