

Industrial

Firststar Fiber Addition

Creative Title

Firststar Fiber expanded their capacity with new contracts and needed extra space to facilitate these changes. They chose Ayars as their design-builder because of our proven success on past projects. We were also able to complete the project prior to the start of their new pending contract dates. Our crews had to be mindful that this business would continue to run even during the construction process. This posed a few challenges, but nothing that some proactive planning couldn't fix from our experienced team.

Project Details

➤ Location:
Omaha, Nebraska

➤ Size:
4,800 sq. ft.
