

Speedway Head Start

Start 'em off right!

Speedway Properties & Community Action Partnership are both clients that we have worked with in the past. When they were wanting to remodel this space to house a new head start, they knew we would be the right ones for the job. This project was needed to be completed in a hurry, but also needed to include some key elements within the design. We were able to deliver on both fronts. The facility includes 7 toddler classrooms, 2 infant rooms, gross motor space, a break-room, kitchen, offices, a conference room, a mothers room, restrooms, along with a fenced in playground area.
