

# First Step Preschool

## The First Step to a Great Future

After leasing a space for a period of time, First Step Preschool's owner decided she wanted to own her own facility. She knew Ayars & Ayars, Inc. was the right choice to complete this remodel project of her new space after having worked with us on 3 other projects within the past few years. Our scope of work for the project includes design, demolition, excavation, concrete, fencing, and various finishes. The facility now has a large muscle room, a toddler room, Pre-K rooms, Pre-School rooms, and a school aged children's room.

## Project Details
