

BNSF Cold Storage Facility

Calm, Cool, and Collected

Ayars & Ayars, Inc. recently teamed up with BNSF Railway to design and build a new cold storage facility in Superior, Wisconsin. The new building will provide much needed space for items that require a temperature-controlled environment. Manufactured and supplied by Butler Manufacturing, the pre-engineered metal building's structural steel framing system will be 18,382 sq. ft. in total. Our scope of work for the project includes sitework, concrete, metals, and finishes.

Project Details

➤ Location:
Superior, WI

➤ Size:
18,382 sq. ft.

➤ Type of Construction:
Pre-Engineered Metal Building

➤ Project Completion:
Winter 2020

➤ For over 160 years, BNSF has operated one of the largest freight railroad networks in North America.
