## Speedway Properties - Virtual Incision

### Robots for the Future

Speedway Properties has been a consistent client of ours and when they came to us to assist in the renovation of a three-story facility, we could not wait to get started. We were excited to work with the Virtual Incision team in making their new headquarters a reality. This renovation included three floors of office spaces, conference rooms, common spaces, a designated floor for their engineering team, a lounge area and exterior balcony go and refresh in the crisp Nebraska spring air. As you look down the spiral staircase, glass walls give you a glimpse of the creative minds working on the Virtual Incision's mission to simplify robotic surgery, so more patients, surgeons, and healthcare facilities have access to it's benefits every day.

### Project Details

Location:  
Lincoln, Nebraska

Size:  
36,100 sq. ft.
