Warroad Community Childcare Center

Providing for the Community

This project is a 9,141 square foot wood framed childcare center serving 114 children of the Warroad community. The building consists of two infant, two toddler, two preschool rooms and one school age classroom which also services as a large motor room. The center is filled with many amenities including covered drop-off space protecting families from inclement weather, fenced in playground space with patio, commercial kitchen for daily meals and a Mother's/Sensory room. Ayars & Ayars, Inc. knowledge of the childcare industry allowed us the ability to meet the client's budget, obtain the desired building ascetics, and fulfill the childcare capacity needs for the Warroad community.
