

Amazon Ablution Room

Culture of Diversity, Equity & Inclusion

This project consisted of dividing an existing training room space into an ablution room and prayer room for the growing Muslim community workforce at the Amazon facility. The project included an ablution room with individual wash stations and Wudu stools, a prayer room with adjustable privacy curtains and a conference space for meetings and employee training. Ayars & Ayars, Inc. provided interior demolition of existing training space, provided new partition walls and finishes and installed ablution room and prayer room specific accessories and plumbing fixtures. This room will now become the prototype that Amazon will model in other facilities.
